

AR Film Key Features and Capabilities

Anti-Reflective and Anti-Glare films provide an effective OEM or retrofit solution to reduce glare and reflection coming off displays or other optical film solutions.

Application areas are all sorts of displays, shop fronts, glass partitions, etc.

Anti-Reflective films are extremely effective across the entire visible range of the spectrum.

- Wet Coating Chemistry
- Flexible substrate web coating
- 1mil to 8mil film substrate thickness
- Coating film width up to 72"
- Film with UV blocking up to 375nm
- Adhesive lamination to another PET film or other substrate
- VLT up to 96 and haze below 1.0
